

TOPIC

Energy Audit: Finding Opportunities for Energy Savings

SYNOPSIS

As a participant in the Private Sector Energy Efficiency (PSEE) Project, EdgeLine Engineering was audited to establish energy usage to identify opportunities for energy saving, propose viable options and the impacts on cost and carbon footprint. The energy review assessed the energy saving opportunities and their costs and benefits to the company and provided investment recommendations. There will be a report back on this project and its implications for Edgeline Engineering.

SPEAKER

**Clement Makhaloa
(Edgeline Engineering (Pty) LTD)**
